This certificate program enables Project Managers to prove that they have the Knowledge, Skills, Attitude and Experience to improve Business Performance through Project Performance and are qualified to advance to an executive level position.

Phase I: Knowledge

Accelerated PM Basics – Understand the basic principles of Project Management. A one day interactive program to understand the basic concepts in the Project Management Institutes Body of Knowledge (PMBOK® Guide). 0.8 CEUs/8 PDU (people who earn a PMP® need to maintain that credential by earning Professional Development Units – PDU).

Accelerated PMP Exam Prep – Develop the knowledge and skills to successfully pass the PMP exam. A week long program that ends with the executive passing the PMP® exam on the last day of class.

Phase II: Attitude and Skills

SPE Intro and Cheetah Project Management – Each month a new group of SPE candidates start Phase II. Candidates are organized into cohorts made up of ten people to ensure maximum interaction. The cohorts come together for two days to meet each other, learn how to interact with the online learning system and to participate in our highly interactive one day program called Cheetah Project Management. In Cheetah Project Management candidates learn how to facilitate a project launch with a project team of people from a wide range of PM competency levels. They practice how to prevent the common conflicts that derail project teams. The SPE candidates implement the concepts immediately to more effectively lead a project team. 1.6 CEUs/16 PDUs

SPE Leadership Strength Builder – Develop and cultivate world class Project Management capabilities in yourself and in your staff. This is an online class that uses an interactive Meyers Briggs style assessment of how people react to various project management situations to understand their innate PM strengths. 0.5 CEUs/5 PDUs

Project Negotiation Skills – Competently and quickly negotiate the many situations found in projects to improve overall business performance. A four week instructor led online program. Candidates spend five hours per week doing the activities in the course of their day-to-day work. 2.0 CEUs/20 PDUs

Communicating Through Conflict – Leverage the energy of conflict common in various project phases to improve project performance. A four week instructor led online class. Candidates spend five hours per week doing the activities in the course of their day-to-day work. 2.0 CEUs/20 PDUs

Enterprise Wide Project Management – Gain significant business performance improvements by standardizing Project Management practices throughout an organization. A seven week instructor led online program where you do real assessments on the inner workings of your organization's PM practices to better effect overall business performance improvements. 3.5 CEUs/35 PDUs

Project Portfolio Leadership – Meet the overall company strategic imperatives through stewardship of the portfolio of projects. A six week instructor led online program. 3.0 CEUs/30 PDUs

Senior Project Executive Development – This is the last program of Phase II where the cohort collaborates in person to work through an entire project simulation from beginning to end. They experience all the elements of being a high performing project executive. This includes remote/virtual project team collaboration prior to starting the classroom portion of the class at our adventure learning facility. The teams do their project initiation and project planning activities via an online course collaboration. They do the project execution, project control and project closeout with their team in the adventure learning classroom. The total course is 60 hours of training. 6.0 CEUs/60 PDUs

Phase III Demonstration

Senior Project Executive Demonstration – This is the final course of the certificate program where the project executive has to demonstrate that they can execute a project in under three months that contributes significantly to the overall performance of their business. They will also be required to fill out a PM Scorecard™. It is an instructor led online program that lasts for up to three months. 4 CEUs/40 PDUs

Project Scorecard – The high performing project executive is required to complete at least three Project Assurance Technologies (PAT) Scorecards™ per year to maintain their certificate in good standing. The project scorecards are completed online by the Project Manager, the Project Manager’s Sponsor, Stakeholders, Customers, and Team Members. 0.5 CEUs/5 PDUs per score card.

Registration, Requirements, and Costs

Participants have two years to complete the coursework to earn the certificate. Phase I and II courses have to be complete prior to doing Phase III Demonstration events. Students who have the PMP® certification in good standing can have the Phase I requirements waived. Candidates must participate with their Phase II cohort at the time specified for that cohort’s classroom courses. A 10% discount is offered to candidates who pay for entire program in advance. We accept 10 people per cohort. Applications to be considered for this program are available at www.cheetahpm.com.

SPE Certificate Integrity – To complete and maintain the SPE certificate, project executives must demonstrate they can deliver project performance that earns a passing rating (70%) on their project scorecard as rated by the Project’s Sponsor, Stakeholders, Customers, and Team Members. This preserves the integrity of our program and improves the value of the certificate for all who hold it. This certificate program is not about passing a test to demonstrate competency, it’s about showing bottom line business results. This program enables rapid advancement of top performers who can consistently deliver bottom line business results.

Number	Name	Delivery/Duration	Cost
